DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-9 and 15-17, drawn to a film lamination method, classified in class 156, subclass 308.2.
 - II. Claims 10-14, drawn to a film lamination apparatus, classified in class 156, subclass 380.6.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as laminating a film onto any substrate other than a semiconductor substrate.

- 3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Application/Control Number: 10/718,653 Page 3

Art Unit: 1733

5. This application contains claims directed to the following patentably distinct species:

In the event Group I is elected applicants are required to elect one of the following species:

Species I (appears to read on claims 1, 2, 3, and 15) directed to Figure 4, i.e. roller comprising a cylindrical metal body and a resin layer formed on an outer surface of the cylindrical metal body including a single heat-generating part.

Species II (appears to read on claims 1, 4, 5, and 15) directed to Figure 5, i.e. roller comprising a cylindrical elastic member including a plurality of heat-generating parts.

Species III (appears to read on claims 1 and 6) directed to Figure 8, i.e. roller comprising a plurality of short rollers.

Species IV (appears to read on claims 7, 8, and 16) directed to Figure 9, i.e. a table not the roller includes the heat-generating parts.

Species V (appears to read on claims 9 and 17) directed to Figure 11, i.e. a roller below a table not the roller contacting the substrate includes the heat-generating parts.

The species are independent or distinct because each species is directed to a mutually exclusive and patentably distinct roller and heat generating part.

In the event Group II is elected applicants are required to elect one of the following species:

Species I (appears to read on claim 10) directed to Figure 4, i.e. roller comprising a cylindrical metal body and a resin layer formed on an outer surface of the cylindrical metal body including a single heat-generating part.

Application/Control Number: 10/718,653

Art Unit: 1733

Species II (appears to read on claim 11) directed to Figure 5, i.e. roller comprising a cylindrical elastic member including a plurality of heat-generating parts.

Species III (appears to read on claim 12) directed to Figure 8, i.e. roller comprising a plurality of short rollers.

Species IV (appears to read on claim 13) directed to Figure 9, i.e. a table not the roller includes the heat-generating parts.

Species V (appears to read on claim 14) directed to Figure 11, i.e. a roller below a table not the roller contacting the substrate includes the heat-generating parts.

The species are independent or distinct because each species is directed to a mutually exclusive and patentably distinct roller and heat generating part.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1733

6. A telephone call was made to William Westerman on 2/17/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

- Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **John L. Goff** whose telephone number is **(571) 272-1216**. The examiner can normally be reached on M-F (7:15 AM 3:45 PM).

Application/Control Number: 10/718,653

Art Unit: 1733

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Richard Crispino can be reached on (571) 272-1226. The fax phone number for the

Page 6

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
